Recommendations: The investigating officer recommends that no further action be taken regarding this inquiry. The platoon had set up proper visual security and stand-off and was only at the location for approximately 3-5 minutes. When the vehicle approached the platoon was in the midst of taking down their security. Based upon the actions of the driver he did pose a potential threat to the platoon and continued to progress despite verbal/visual warnings and warning-shots. The platoon executed RAMP procedures in accordance with the ROE and, if anything, waited too long before engaging the target with kill-shots. The only recommendation that I would make is for the platoon to execute a faster transition from disabling to kill shots in the event that the target is a VBIED.
