I know there is an urgency about the 7th Floor to attempt to defend the CIA program in the public domain. However, we need to have the 7th Floor confront the inconsistency in filing a CIPA declaration in Passaro about how critical it is to keep this information secret, and at the same time planning to reveal the darn near the entire program. These goals are not obviously compatible.

Well, this certainly makes the declaration I just wrote about the secrecy of the interrogation program a work of fiction
